Summer Reading Sponsors
The Washington County Library System is proud to present the 2012 Summer Reading program for children and teens in Washington County. This year, the Library System has added a Summer Reading program for adults. This new program for adults will run concurrently with the children and teen programs.

The Summer Reading program encourages reading throughout the summer months. Readers who reach their reading goals receive incentives throughout the summer that helps to encourage them to read consistently.

The Library System also hosts special programs and events at all seven branches that fosters learning in an atmosphere of imagination, creativity, and fun.

This program has been made possible though the generous contributions from sponsors. The support that these businesses offer fills a gap that has been created by budget constraints, and allows the Library System to provide a high quality reading program to the members of our local community.

The Library System would like to thank our sponsors for their vision in assisting the Library System in providing opportunities to increase literacy throughout the community. Through their generous acts of support for this program, these sponsors are investing in the future of our youth, our community, and our society.

June Green Tip
Beat the heat this summer and stay cool while using less energy. Here are a few tips to keep your house cool without air conditioning. Keep the house closed tightly during most of the day while it’s hot outside and open windows back up at night to ventilate and re-cool the house for the next day. Fans are also a good option; a window fan on the downwind side of the house can help effectively cool the whole house.

If you do have to turn on the AC, turn on ceiling fans as well, this can help cool the house and use less energy from the air conditioner therefore saving money and energy. Another option is white window shades or mini blinds, they can help reduce solar heat gain by up to 50%.

Last but not least, if you are using and air conditioning unit make sure to keep it properly maintained. If your air conditioner is more than 10 years old, consider replacing it with a unit that has earned the ENERGY STAR. Depending on where you live, replacing your old heating and cooling equipment with ENERGY STAR qualified equipment can cut your annual energy bill by nearly $200.

~Wendy Uribe, St. George Library

Why Children Should Read Every Day
Books have the power to benefit children in a myriad of ways. As a parent, teaching your child the importance of reading is one of the most important things you can do to prepare your child with a foundation for academic excellence, communication skills and self-confidence.

Grace Mann, Children’s Librarian at the St. George Branch explains that reading helps to build a child’s vocabulary, increases communication skills, and improves academic performance. She states, “Reading 20 minutes a day is the difference between a happy reader and an indifferent reader.”

The U.S. Department of Education created a study that explains why your child should read 20 minutes every day:

Let’s figure it out mathematically!

Student A reads 20 minutes five nights of every week;
Student B reads only 4 minutes a night...or not at all!

Step 1: Multiply minutes a night x 5 times each week.
Student A reads 20 min. x 5 times a week = 100 mins./week
Student B reads 4 minutes x 5 times a week = 20 minutes

Step 2: Multiply minutes a week x 4 weeks each month.
Student A reads 400 minutes a month.
Student B reads 80 minutes a month.

Step 3: Multiply minutes a month x 9 months/school year
Student A reads 3600 min. in a school year.
Student B reads 720 min. in a school year.

Student A practices reading the equivalent of ten whole school days a year. Student B gets the equivalent of only two school days of reading practice. Which child do you think will read better and know more? (U.S. Dept. of Education, America Reads Challenge)

If daily reading begins in infancy, by the time the child is five years old, he or she has been fed roughly 900 hours of brain food! Reduce that to just 30 minutes a week, and the child’s hungry mind loses 770 hours of nursery rhymes, fairy tales and stories. Guess you now understand why reading daily is so very important.

Why not read every night as a family? It is great to just shut off the television for 20-30 minutes and read . . . and share.

There is nothing quite like a good book. Books transport us from our ordinary world into the world created by the author. Jump-start your kids’ imaginations through reading—you’ll change their lives!
